

1930 CENSUS *Schedules*

T626
2,667 ROLLS

The 1930 census schedules are arranged by state or territory and thereunder by county. The counties are not necessarily listed in alphabetical order. Be sure to review the listings for the entire state or territory before placing your order.

For the 1930 census, the Bureau of the Census developed a new ED numbering system. Within each state, each county has a distinct number that is followed by the specific enumeration district number. The county numbers were assigned based on the alphabetical order of the counties. For example, Adams County, Washington, has counties 1-1 to 1-22.

This microfilm has been reproduced by the National Archives and Records Administration from the highest quality master negatives available from the Bureau of the Census. The original film includes defects that affect the legibility of some frames; the original schedules no longer exists.
