|------------|---|----------------------|------------------|
| | <p><u>Ammunition Lot History Files, FN 1409-08.</u></p> <p>Description - Documents relating to the inspection and acceptance of complete rounds of ammunition, propellants, missiles, and rocket motors. Included are data cards, acceptance sheets, firing records, and related papers.</p> <p>Disposition - Destroy 45 years after acceptance of each lot of ammunition and shipment from storage. Do not retire.</p> <p>Background - These documents are presently destroyed 15 years after acceptance of each lot of ammunition and shipment from storage. This is not a sufficient length of time. These files comprise the complete history of each lot of ammunition. When ammunition in a given lot malfunctions, these files provide information for investigations or law suits resulting from the malfunction. These files also provide the means of determining if a given lot of ammunition is troublesome or faulty. As a result, the complete lot can be withdrawn or other appropriate action can be taken. Ammunition can move from storage into supply channels and can remain in these channels for a number of years before it is actually expended. There is no way of knowing when the ammunition is actually expended after it leaves storage.</p> | | |
